

CARCASSES FOR BEDROOMS

We supply made to measure and standard sized bedroom carcasses. All cabinets are manufactured from 18mm high density melamine faced chipboard, edged all round with PVC edging tape.

All are colour co-ordinated on both sides, providing a product which is colour matched inside and out. Our units are supplied rigid (fully assembled), except for wardrobes which are supplied flat packed, using rigid fix cam and dowel construction.

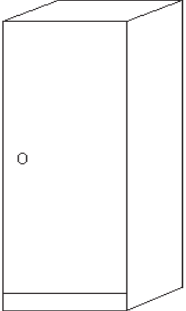

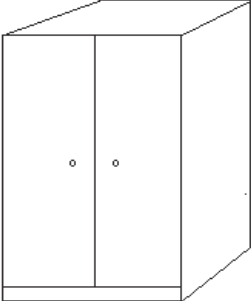

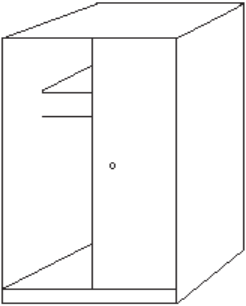

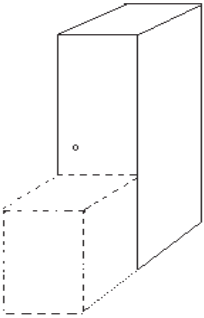

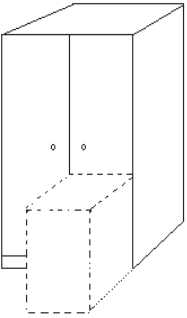

On bedroom carcasses a service gap of 25mm is provided at the back of all carcasses. Wardrobes and top box units are 570mm deep and base units are 470mm deep. Full gables are standard on all base units. Clip on hinges are supplied as standard. Softclose adaptors are optional at an additional cost.

All of our units are handed for hinges, so please specify left hand or right handed. MFC drawer boxes are supplied as standard. Blum soft close drawer systems are available on request. Price on request.
